DETAILED ACTION

This office action is in response to Applicant's amendment filed 4/20/2006.

Status of Claims

- Claim 5 was canceled.
- Claim 1 was amended.
- Claims 1-4, 6-10 are pending.

Allowable Subject Matter

- [1] Claims 1-4 and 6-10 are allowed.

Reasons for Allowance

- [2] The following is an examiner's statement of reasons for allowance. This application has been reviewed by the examiner and meets all formal and substantive (i.e., statutory) requirements and the language of the claims is enabled by, and finds adequate descriptive supported in the application disclosure as originally filed.

The primary reason for the allowance of the claims is the presence of limitations in the independent claims (claims 1, 6, and 10), which are not found in the prior art references. The examiner believes that the record of the prosecution as a whole makes clear his reasons for allowing a claim or claims. However, the examiner would like to point out one or more specific reasons and/or limitations that the prior art fails to disclose and/or make obvious. Hence, with regard to claim 1, the prior art fails to disclose of the exact array of features from the instant claim including that of the compressed spring being coiled about said fastening member, and engaging the bottom of said outwardly extending peripheral flange and the top of said retainer, and when in use, thereby urging said protrusion into engagement with the bottom of said retainer and for urging said helical threads away from the top of said retainer.

Art Unit: 3677

As for independent claim 10, the prior art, either alone or in combination with corresponding limitations as stated above, fails to teach or disclose of the exact specifications of the tubular sleeve with shoulders; pair of wedges with serrated rim and plurality of outwardly and upwardly extending teeth; fastening member with flange, helical threads, protrusion, and keyed portion for slidable positioning; polygonal cross-sections for deterring turning, and spring for urging the above elements in their respective directions as a collective functioning device.

Lastly, independent claim 6 is allowable since it incorporates that the wedge has a serrated rim with a plurality of outwardly and upwardly extending teeth; there being no motivation to alter the wedge shape of Alder, or that of other prior art, to include such a feature. Claims 7-9 are dependent therefrom Claim 6.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee, and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
